Step2: Plug Your Projector To The Power Source Check where you are connecting your projector from to have a source of power.. (Note: Adapters vary depending on your computer's video inputs Trying to connect a MacBook Air (early 2015) with a Thunderbolt port to a 3M Handheld projector (early 2013 model) that has a 30 pin male connector.. Step 1: Turn Your Mac On When you are getting ready to projector your item from your Mac to your projector you have to turn on your Ma c and be ready for the content.. Lucky for you, this endeavor is one that is simple for those unfamiliar and veterans of technology alike.

Connect the video cable (usually VGA or HDMI) from the projector to the Mac In order to do this, you will most likely need a Mac adapter cable.. The Mac has a Thunderbolt to Female VGA connecting cable, Problem getting the 30 pin into the VGA or directly to the Thunderbolt port.. Mac Adapter Cable For ProjectorMac Converter For ProjectorConnect Macbook To ProjectorMac Shortcut For ProjectorYou just got that shiny new projector and are wanting to start to enjoy your preferred media or visualize your professional presentation on the big screen as soon as possible.
