Aug 13, 2019 To install the latest Windows support software, you need a 16GB or larger USB flash drive formatted as MS-DOS (FAT).. RootsMagic has been in the family tree business for years and although started life on Windows, can now be used on Mac too.. In reality, RootsMagic isn't a native Mac app but it works on Mac thanks to a wrapper made by Crossover which allows it to run on macOS.. Start your Mac from macOS Plug the USB flash drive into your Mac Open Disk Utility, which is in the Utilities folder of your Applications folder.
